SUPPORT and SOLUTIONS

- Automotive**
 - RF Remote Control
 - Tyre Pressure Monitoring System (TPMS)

- Telecommunication**
 - Wireless
 - *WLL
 - *VSAT
 - *GSM

- Power**
 - Energy meter

What kind technical support and solutions does BBS Electronics provide?

- Core application concept demonstrations
- Component level functionality verifications
- Long-term silicon technology roadmap advice
- Construction of reference circuits or software development tools
- Turnkey design (on selective basis)
- General technical assistance and problem-solving in application of component

Who benefit from BBS Electronics' technical support and solutions services?

- OEM customers
- R&D centres
- Design consultants

What are the benefits?

- Shortening of R&D cycle
- Earlier time-to-market for your product
- Astute investment on R&D tools
- Systems against obsolescence of component technologies
- Choosing the right key components with long-term roadmap to avoid costly re-designs
- Repeated learning curves and opportunity costs
- Commercial advantage to your product by deploying the latest, leading edge performance components embedded in our design at a competitive cost level
